

### **School Success Video Reflection**

After watching the video about ways parents can support school success, think about your children and family and the opportunities provided in your home.

What books, games, toys do your children enjoy using?

Are there books or reading material available at home for your child? Do you have neighbors or other family members who would do a book exchange with you to give your children more books? Do your children, or you, have a library card?

What are other things your children like to do where they might be learning something? Do they help you to cook? Do they do yard work on the weekends?
